S-64E Повітряний кран з універсальним контейнером

Гелікоптер Sikorsky S-64E Skycrane має універсальне призначення. Його використовують для різних операцій: будівельних і монтажних робіт або переміщення великих вантажів. Цей унікальний гелікоптер також використовується як рятувальний. У такому разі він може нести спеціальний контейнер, пристосований для потреб рятувальних служб. Ці контейнери свого часу розробили військові спеціально для армійських гелікоптерів CH-54. Контейнери мали вікна, двері та апарель у кормовій частині, що давало змогу перевозити всередині військову техніку - наприклад, гармати або легкі всюдиходи. Такі універсальні контейнери навіть використовували для парашутного десантування солдатів. Загалом побудували 22 контейнери, кожен з яких мав особистий військовий реєстраційний номер. Контейнери, які використовують разом із Sikorsky S-64E Skycrane - це колишні військові контейнери, які тепер мають яскраве помаранчеве забарвлення, характерне для більшості цивільних гелікоптерів S-64.

Тактико-технічні характеристики S-64E Повітряний кран з універсальним контейнером

Довжина фюзеляжу, м	21.41
Висота, м	5.66
Маса порожнього (з контейнером), кг	до 10100
Маса вантажу у контейнері, кг	до 6500
Максимальна злітна маса, кг	19 050
Двигуни	2xPratt Whitney T73-P-1, 2x4500 к.с.
Максимальна швидкість, км/год	213

ФАРБИ, ЩО ВИКОРИСТОВУЮТЬСЯ / USED COLORS:

COLOR	ICM
A Гумовий чорний Rubber Black	1039
B Нейтральний сірий Neutral Grey	1036
C Яскраво-помаранчевий Medium Orange	1045
D Небесно-сіра Sky Grey	1033
E Білий White	1001
F Жовтий Deep Yellow	1003
G Червоний Deep Red	1007
H Алюміній Aluminium	1023
J Сталь Natural Steel	1025
K Масляна сталь Oily Steel	1026
L Збройовий метал Gun metal	1027

Перед збиранням уважно прочитайте інструкцію з монтажу. Кожна деталь пронумерована. Дотримуватися послідовності складання. Необхідні робочі інструменти: ніж і напилек для зачищення деталей, гумова стрічка, клеюча стрічка і прищипки для білизни (для притиснення склеюваних деталей). Деталі з пластику очистити в розчині милого милого засобу і висушити на повітрі для того, щоб фарба і перевідні картини краще прилипали. Перед приклеюванням перевірити, чи підходять деталі; клей наносити економно. Хром і фарбу видаляти з поверхонь склювання. Невеликі деталі пофарбувати перед тим, як вони будуть вдалені з рамок. Фарбу необхідно добре просушити, тільки після цього продовжувати складання. Кожну відповідну декаль вивірити окремо і приблизно на 20 секунд занурити в теплу воду. На позначеному місці картинку відокремити від паперу і притиснути промокальним папером.

C A U T I O N !
Read the instructions thoroughly prior to assembly. Each component is numbered. Adhere to specified sequence of assembly. Tools required: knife and file for removal of components from frame; rubber bond, adhesive tape and clothes pegs for clamping components together after applying adhesive. Clean plastic components in a mild detergent solution and allow to air-dry so that paint and transfers adhere better. Prior to applying adhesive, check to see whether the components fit together; apply adhesive sparingly. Remove chrome and paint from the contact surfaces. Paint small components before removing them from the frame. Allow paint to dry well, and only then continue to assemble. Cut out each transfer individually and immerse in warm water for approx. 20 seconds. Slide transfer off paper and into designated position, then press on with blotting paper.

S-64E Skycrane with Universal Pod

The Sikorsky S-64E Skycrane is a versatile helicopter used for construction, installation work, and transporting large cargo. It also serves in rescue operations, carrying a special container adapted for rescue services. These containers were originally developed by the military for CH-54 army helicopters to expand their transport capabilities. Each container featured windows, doors, and a rear ramp, allowing it to carry military equipment such as artillery pieces or light all-terrain vehicles. The containers were even used for parachute deployment of soldiers. A total of 22 containers were built, each with its own military registration number. The containers now used with the Sikorsky S-64E Skycrane are former military units repainted in the bright orange color scheme typical of civilian S-64 helicopters.

Tactical and Technical Specifications of S-64E Skycrane with Universal Pod

Length fuselage, m	21.41
Height, m	5.66
Empty weight (with the pod), kg	up to 10100
Weight of cargo in the pod, kg	up to 6500
Max take-off weight, kg	19 050
Engines	2xPratt Whitney T73-P-1, 2x4500 hp
Max Speed, km/h	213

COLOR	ICM
M Іржава латунь Rusty Brass	1019
