

Festive dinner on the front line

1/35 SCALE MODEL KIT No DS3532

Святкова вечеря на передовій

Гаряча та смачна їжа на фронті відіграє для солдатів значно більшу роль, ніж для звичайних громадян у мирний час. Регулярне харчування на війні, окрім вирішення питання бойової готовності, має велике моральне значення. В армії США у часи Другої світової війни для приготування їжі використовували польові печі M-1937, які працювали на рідкому паливі. Вони дозволяли смажити, запікати або тушувати різноманітні страви, і навіть випікати пироги. Також подібні печі могли розміщуватися у кузовах армійських автомобілів, переобладнаних під польові кухні, такі транспортні засоби називалися «Кухонними вантажівками». Ці автомобілі мали подовжені дуги для брезентових тентів кузова, щоб кухарі в процесі роботи могли стояти в повний зріст. Дерев'яні сидіння-лавки для особового складу, які в армійських вантажівках були розташовані всередині кузова, в «Кухонних вантажівках» могли розташовуватися із зовнішнього боку, для розміщення на них каструль, деко та іншого кухонного інвентарю. Кухарі польових кухонь та «Кухонних вантажівок» намагалися забезпечити солдатів гарячим харчуванням щонайменше двічі на день. Більша частина їжі, що готувалася, була грубою, але калорійною, разом з тим американських солдатів по можливості намагалися балувати і чимось смачним – наприклад, запеченою індичкою.

Festive dinner on the front line

Hot and hearty meals on the front lines played a much more significant role for soldiers than for ordinary civilians in peacetime. Regular meals during wartime not only addressed the issue of maintaining combat readiness but also had considerable moral importance.

During World War II, the U.S. Army used M-1937 field ovens, which ran on liquid fuel, for cooking. These ovens allowed soldiers to fry, roast, stew, or even bake pies. Similar ovens could also be installed in the beds of army trucks converted into field kitchens; these vehicles were called «Kitchen Trucks.» These trucks had extended frame arches for canvas covers so that cooks could stand upright while working.

Wooden bench-seats for personnel, which were normally installed inside standard army trucks, could be placed on the outside in Kitchen Trucks to hold pots, baking trays, and other kitchen equipment. Cooks working in field kitchens and Kitchen Trucks aimed to provide soldiers with hot meals at least twice a day. Most of the food prepared was simple but high in calories. However, whenever possible, American soldiers were treated to something more enjoyable—for example, roasted turkey.

Перед збиранням уважно прочитати інструкцію з монтажу. Кожна деталь пронумерована. Дотримуватися послідовності складання. Необхідні робочі інструменти: ніж і напилоч для зачистки деталей, тумова стрічка, клеєва стрічка і прищипки для білизни (для притиснення склеюваних деталей). Деталі з пластику очистити в розчині милого милоного засобу і висушити на повітрі для того, щоб фарба і первісна картинка краще прилипали. Перед приклеюванням перевірити, чи підходять деталі, клей наносити економно. Хром і фарбу видаляти з поверхонь склеювання. Невеликі деталі гофрувати перед тим, як вони будуть вивалені з рамок. Фарбу необхідно добре просушити, тільки після цього продовжувати складання. Кожну відповідну декаль вирізати окремо і приблизно на 20 секунд занурити в теплу воду. На позначеному місці картинку відокремити від паперу і притиснути промокальним папером.

Read the instructions thoroughly prior to assembly. Each component is numbered. Adhere to specified sequence of assembly. Tools required: knife and file for removal of components from frame; rubber bond, adhesive tape and clothes pegs for clamping components together after applying adhesive. Clean plastic components in a mild detergent solution and allow to air-dry so that paint and transfers adhere better. Prior to applying adhesive, check to see whether the components fit together; apply adhesive sparingly. Remove chrome and paint from the contact surfaces. Paint small components before removing them from the frame. Allow paint to dry well, and only then continue to assemble. Cut out each transfer individually and immerse in warm water for approx. 20 seconds. Slide transfer off paper and into designated position, then press on with blotting paper.
